

Trip to the Hockerman Brothers Farm

On Tuesday, March 19th, all of the 4th grade classes from our school district went on a tour of the Hockerman Bros Inc. Dairy Farm! The students were able to visit many different stations around the dairy farm and learn about the cow's nutrition, speak with a veterinarian about care for the cows, see how soil absorbs water under various growth conditions, make their own butter, and even watch a cow be milked by a machine! Thank you so much to the Hockerman Bros Inc, the Marquette County Farm Bureau, and to the Ag in the Classroom program for making this incredible experience a possibility!
